

Reducing Theft Without Slowing Sales in Home Improvement Stores

We know the struggle.

Large stores. Products everywhere. Limited cabinets. Not everything can be secured—or accessed—efficiently.

Securing Your **DIY Store** Shouldn't Mean Redesigning It

Security shouldn't slow your Home Improvement store down. Discover how to protect high-risk products while keeping your store efficient and ready to sell.

What Changes in Your Store

Reduce Shrink

Protect high-theft products without locking them away.

Simplify Access

Spend less time unlocking and more time helping customers.

Drive More Sales

Give customers faster access so they can pick up and buy.

For those products customers need to *experience* before they buy:

Cable Lock Anchor

Great For: Power Tools, Handheld Equip.

Strong Security

Double sided security, one end secures the merchandise, the other anchors to a fixture.

Customer Experience

Customers can pick up and experience products freely.

Easy Remerchandising

Secures a single or multiple products in a matter of seconds.

Clean Displays

The cable stretches when needed and retracts when not in use. Available in different sizes.

Part of the **OneKEY Ecosystem**

Cable Lock

Great For: Power Tools, Soft Goods

Strong Security

Alarming lock that cannot be defeated by magnets.

Customer Experience

Minimal product interference, allowing customers to pick up and experience.

Easy Application

Quick 1-step application makes securing merchandise easy for associates.

Flexibility of Use

Ideal for a wide range of products in DIY stores.

Part of the **OneKEY Ecosystem**

High Security Zips

Great For: High-Value Merchandise

Tethered Security

Alarmed tether secures high-risk tools while keeping them attached to the display.

Try Before Buying

Customers can pick up, handle, and test products without removing security.

Open Display Ready

Keep products accessible on display without moving them into locked cabinets.

Built for High-Theft Items

Designed for power tools and merchandise that are frequently targeted in DIY stores.

Part of the **OneKEY Ecosystem**

For those products that are easy to *grab* and hard to *control*:

Locking Hooks

Great For: Small Tools and Accessories

Built for Peg Hooks and Slatwalls

Ideal for showcasing many products while maintaining control with limited staff.

For High Concealable Items

Protect small tools and accessories that are easy to grab and frequently targeted.

Efficient for Large Displays

Designed for pegboards and slatwalls across high-density DIY displays.

Controlled Access on Hooks

Secure hanging merchandise so only associates can remove products when needed.

Part of the **OneKEY Ecosystem**

Package Wraps

Great For: Boxed Tools and Hardware

Wrap-Based Protection

Secure boxed tools and merchandise with tamper-resistant wraps that deter theft.

Magnet-Resistant Security

Designed to prevent common magnet-based theft methods used in DIY stores.

Built for Boxed Products

Protect a wide range of boxed tools, hardware, and accessories on shelves or hooks.

Shelf Ready

Keep products visible and merchandised while maintaining strong security.

Part of the **OneKEY Ecosystem**

Safers

Great For: Small Hardware and Accessories

Full Enclosure Security

Completely enclose small, high-theft items to prevent removal in-store.

Built for Small, High-Risk Products

Ideal for accessories, blades, and items that are easy to grab.

Visible on Display

Keep products fully visible while securely enclosed on shelves or hooks.

Controlled at Checkout

Products remain secured until purchase, then easily removed by staff.

Part of the **OneKEY Ecosystem**

For those products behind displays needing *faster, more controlled* access:

LIVE Locks

Great For: Cabinets and Displays

Controlled Access

Replace shared codes and padlocks with secure, controlled access for your team.

One Key Across Your Store

Unlock cabinets, cages, and fixtures with a single key for consistent access.

Eliminate Key Chaos

Remove the need for multiple keys and improve control across your store.

Built for Daily Operations

Reduce time spent unlocking so associates can focus on serving customers.

Part of the **OneKEY** Ecosystem

For those products kept in *cages* and *backrooms*:

LIVE Padlock

Great For: Cages and Outdoor Areas

Mobile-Controlled Access

Unlock and manage padlocks using your mobile device for faster, controlled access.

Weatherproof Design

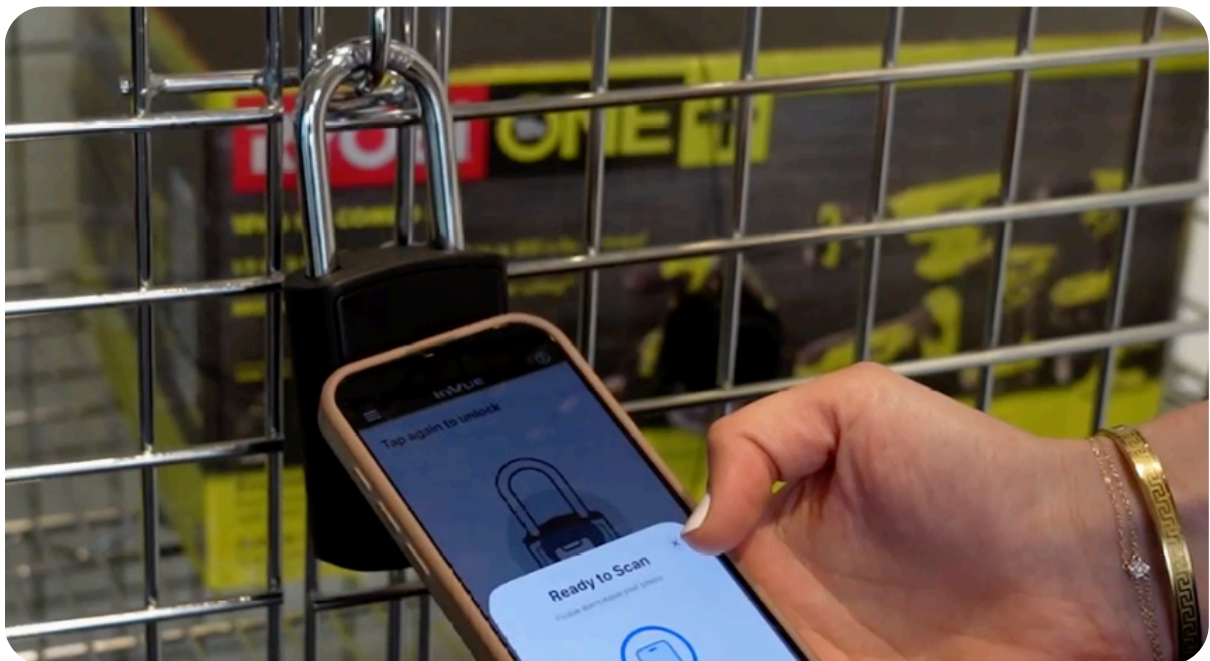

Built to perform in outdoor and demanding environments across your store.

No Shared Codes

Eliminate shared combinations and maintain control over who can access what.

Access Anywhere

Secure cages, gates, outdoor areas, and equipment with flexible, connected access.

Part of the **OneKEY Ecosystem**

For those products typically secured together in bulk:

**Cable Lock Anchor
+ Package Wraps**

Great For: Bulk Merchandise Displays

Flexible Protection

Secure a wide range of items and sizes without changing your setup.

Easy for Staff to Manage

Simple to apply and remove, helping associates secure multiple products efficiently.

Part of the **OneKEY Ecosystem**

For those large, high-value products secured with *chains*:

Padlock

Great For: Restricted Areas, Storage Units

Reliable Physical Security

Secure gates, storage, and fixtures with durable, dependable padlock protection.

Built for Everyday Use

Designed to handle frequent use across busy DIY store environments.

Simple, Familiar Operation

Easy for associates to use with a straightforward locking mechanism.

Versatile Protection

Works across gates, cages, backroom storage, and outdoor areas.

Part of the **OneKEY Ecosystem**

The ONEKey Ecosystem

One Key. One Platform. Total Store Control.

OneKEY gives your team a single, secure way to access cabinets, displays, cages, and fixtures across your entire store.

1. Assign access by role, team, or schedule.
2. Unlock products instantly across multiple setups.
3. Replace shared codes with controlled access.
4. Track who accessed what, when, and where.

Start Securing Your DIY Store the Smarter Way

Reduce shrink, speed up access, and improve the customer experience with solutions built for DIY retailers.
